444 Cabot Mail Center
Cambridge, MA 02138

14 Ladue Meadows
Saint Louis, MO 63141

Education

HARVARD UNIVERSITY
AB in Computer Science

Cambridge, MA
May 2017

Tech Skills

Programming: Python, C, Scala, OCaml, HTML, CSS

Experience

HARVARD SCHOOL OF ENGINEERING AND APPLIED SCIENCES
Research Experience for Undergraduates (REU) Researcher

Cambridge, MA
June – August 2016

- Joined the multidisciplinary Privacy Tools for Sharing Research Data Project, supported by an NSF grant
- Researched loss of utility of a dataset when anonymized using differential privacy. Analysis of dataset and statistical tests conducted with Python.
- Updated Professor Latanya Sweeney's theDataMap project documenting flows of personal data

TRUSTLAYERS

Software Engineer and Policy Consultant

Cambridge, MA
September 2014 – April 2015

- Created new API for core data-use protection product in Scala language
- Coordinated new functionality with front-end engineer for API compatibility
- Developed patent application and developed full documentation for new programming language
- Aided CEO in market research to determine growth potential, and worked in tandem with the marketing team to update website and respond to web analytics

FEDERAL TRADE COMMISSION

Fellow in Technology and Data Governance

Cambridge, MA
June – August 2014

- Worked directly with CTO Latanya Sweeney to define direction of FTC's tech research
- Inspected security practices for 110 iOS and Android apps with man-in-the-middle software
- Investigated online price discrimination and privacy vulnerabilities in a social networking site's API
- Contributed to research presented at the FTC's Big Data conference. Presented to FTC technology panel.

Additional Experience

DIGITAL LITERACY PROJECT
Teacher

Cambridge, MA
January – May 2014

Taught weekly lesson on basic coding concepts to middle school students using Scratch and processing.js

Publications

MEDIUM

<https://medium.com/@roselisker/d088a9c80240>

“Illuminating the Dark Web: searching for geotags in darknet markets”

September 2016

Study on the prevalence of geolocation metadata in darknet markets. 1.6TB archive analyzed using Python. Research covered by the Washington Post, IFL Science, and international media. Post currently at over 20,000 views.

TECHNOLOGY SCIENCE

<http://jots.pub/a/2015103001>

**“Who Knows What About Me? A Survey of Behind the Scenes
Personal Data Sharing to Third Parties by Mobile Apps”**

October 2015

Mobile app survey with sensitive data handling and sharing to third-party domains; based on FTC research
